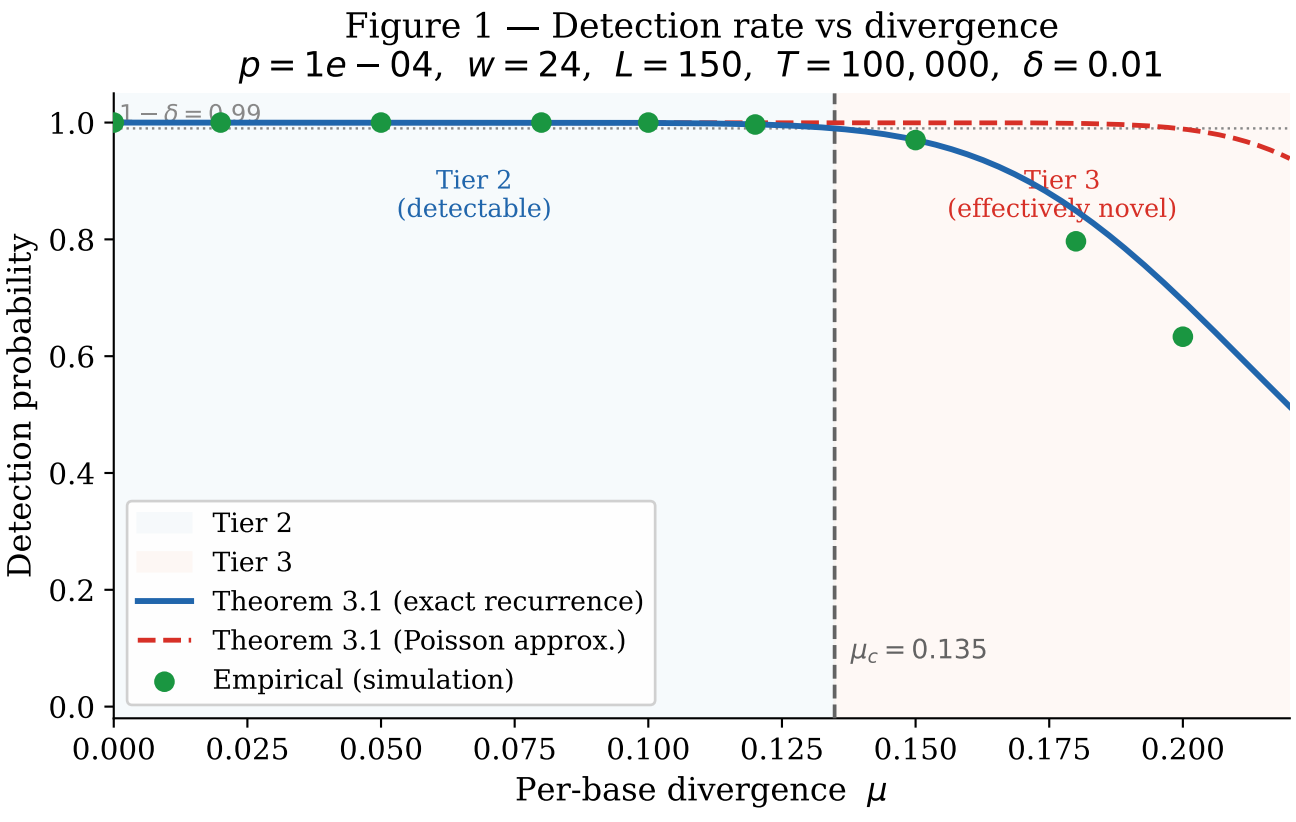

Figure 1 — Detection rate vs divergence
$p = 1e-04$, $w = 24$, $L = 150$, $T = 100,000$, $\delta = 0.01$
$1 - \delta = 0.99$
Tier 2
(detectable)
Tier 3
(effectively novel)
Tier 2
Tier 3
Theorem 3.1 (exact recurrence)
Theorem 3.1 (Poisson approx.)
Empirical (simulation)
$\mu_c = 0.135$
